17. PHOTOGRAPH (within the Box Only)

Address form with fields: Name, Address, Dist., State, Country, Pin

Please affix one recent color photograph of size 3.5 X 4.5cm

Photograph box

18. SIGNATURE OF THE CANDIDATE (Within the Box Only)

19. LEFT HAND THUMB IMPRESSION (Within the Box Only)

Signature input box

Thumb impression input box

Why I should apply

Looking at the need of employment, Kalinga Eye Hospital has designed a course in affiliation to the Government of India's Ministry of Skill Development and Entrepreneurship, where qualified students can opt to build their career in Eye Care. With this one year full time certificate course, one can work in any Eye Hospital across India as Vision Technician or even think of setting up his/her own primary eye care centre.

Kalinga Eye Hospital felt that there is a need for a permanent eye care facility that could provide primary eye care to rural population. Hence it started establishing primary eye care centers (also known as Vision Centre) in rural areas

A vision centre is a primary eye care centre that would serve a rural population of 50,000 - 70,000 on permanent basis. The functions of vision center are

- Comprehensive Eye examination.
- Diagnosis and treatment of simple external eye diseases.
- Delivering spectacles on the spot to correct refractive errors.
- Diagnosis of diabetes through blood sugar examination and counseling appropriately.
- Helping the patient to interact with ophthalmologist in the base hospital through teleconference about the diagnosis and treatment.

- Diagnosis of secondary and tertiary eye problems and referring them appropriately to the base hospital.

To discharge the functions of the vision center effectively, customized training of refractionists is necessary based on the skills necessary to run a vision center successfully. The course will primarily focus on enhancing the skills of refraction practitioners, to upgrade their knowledge and to augment their ability in planning, organizing and execution

Objectives

The aim of this course is to help the candidates

- Check vital signs and do simple lab tests
- Perform basic outpatient procedures
- Examine the eye for eye diseases
- Use necessary instruments to identify and assess eye disorders
- Maintain necessary details in the medical records in the proper format
- Learn basics of counselling skills
- Learn basics of optical counseling
- Process and dispense spectacles
- Dispense ocular drugs
- Use computers for processing data , create reports and maintain data

- Register the patients and do the billing
- Use of Video Calling facility for consultation and expert advice
- Use management principles in running the Vision Centre
- Organize camps and follow up camp with the support from base Hospital

How will you learn?
